

Gaza under fire ... Help Gaza

The ongoing Israeli brutal attack on the besieged Gaza Strip since July 7th 2014, has led to a catastrophic humanitarian situation. Israeli missiles are targeting one of the most densely populated area in the world, with its 1.8 million Palestinians. Residential neighborhoods are being bombarded, targeting civilians including children. So far, the death toll amounts to 1700 martyrs, 9000 injured and is expected to rise due to the ongoing Israeli hostilities. The humanitarian crisis is immense with severe shortages in food, especially milk for children, medicines and medical supplies, fuel, clothing, water, electricity, in addition to severe infrastructure destruction.

The Welfare Association's team in Gaza is on the ground providing basic humanitarian aid and relief for affected civilians. Needs are enormous and increasing by the minute, especially with the bombardment of UN schools where displaced civilians have taken shelter and hospitals where the wounded are being treated.
